

## Education

### Web Development Master, *GreyAtom*

Apr 2020 – Nov 2020 | India

### BE. Computer Science and Engineering, *NKOCET Solapur.*

Jul 2014 – May 2018 | Solapur, India

### H.S.C., *Sangameshwar College Solapur.*

Jun 2012 – Jun 2014 | Solapur, India

### S.S.C., *Siddheshwar Highschool Solapur.*

Jun 2011 – May 2012 | Solapur, India

## Projects

### Trip-Mate

GitHub [🔗](#) Deployed URL [🔗](#)

Developed using ReactJs, JavaScript, Bootstrap. This is an project based on planning trip. Here we can plan for a trip by giving destination location and we can choose multiple locations also. we get the all history of our planning till date. we get the direct count of cities visited, Also we can arrange different trips like Club,Tropic and Trek.

### Recipe-App

GitHub [🔗](#) Loom Video URL [🔗](#)

This project is made by using Reactjs, Bootstrap, JavaScript, HTML5, CSS3. In this project we can add recipes, We can see all recipes with different filter.

### Book-Laboratory

GitHub [🔗](#) Loom Video URL [🔗](#)

I made this project using Angular, Typescript, Nodejs, mySql Angular-Material, HTML5, Bootstrap4, CSS3, API. In this project We can add, delete Books and also we can search books by name from database. In this project one more interesting part is like, We can search any type of books from API.

### School App for Student

GitHub [🔗](#) Loom Video URL [🔗](#)

Using Angular, Typescript, Nodejs, JavaScript, mySql, Localhost, Bootstrap4, HTML5, CSS3. In this project student can access his own account. Student can see homework, notice, notes, profile, mark, test.
